

Sandwich mounting valves

Valvole per montaggio modulare

VALVOLE PER MONTAGGIO MODULARE *SANDWICH MOUNTING VALVES*

Le valvole per montaggio modulare comprendono un'ampia gamma di funzioni quali la limitatrice di pressione, overcenter, riduttrice, sequenza, controllo portata e di blocco per le flangiate NG6, NG10, NG16. Tali valvole sono montate tra la valvola direzionale e la base.

CBF propone un'ampia varietà di basi monoblocco, con e senza valvola limitatrice, valvola elettrica e regolazione della portata. Possono essere per circuiti in serie o parallelo, da uno ad otto stazioni.

Sandwich Valves provide a variety of check, flow control, pressure relief and pressure reducing, overcenter, sequence functions in a NG6, NG10, NG16 sandwich style valve. They can be single or double effect.

These valves are mounted between directional control valves and their mounting surface.

CBF proposes the manifold plate for these sandwich valves, with or without relief valve, electrical by-pass and flow control valve.

The manifold are available for series or parallel circuit, from one to eight stations.
